2014-2015 Achievement: Maxine Smith STEAM Academy

Implementation Strategy and Results:

"We utilize Learning Blade for homework, classwork, and group work. Learning Blade lends itself to being an integrated part of our current curriculum. If students are absent, they can easily log on at home or in the library to catch up to their peers. Being that it is self-paced students can work ahead (enrichment) or work more slowly to thoroughly understand the material (remediation). Another great component of LB is that it offers reports for students, teachers, and parents. This makes monitoring the learning progress of the child so much easier and more effective. Now teachers know exactly what students are comprehending and what they are not and can modify instruction accordingly. Learning Blade's online curriculum pushes our students towards our district's goals and towards performing well on the TN Ready exams."
